Custom Made Footwear

Custom made footwear is exactly that – **custom made to fit a person's foot** and is available in many colours and designs.

When footwear is made for a medial purpose with a foot that has a personal shape, this is reflected in the footwear. When you are in need for custom made or prefabricated medical grade footwear, then standard footwear is no longer suitable.

Custom footwear has special features and often looks a bit different from standard footwear, however colour, style and material is always a matter of your choice. Here is a small selection:

A typical pair of custom boots

Custom made boots can look like a pair of sport shoes

Custom boots can have a casual look

Most footwear can be made with laces or Velcro and in many colours

They can look like a pair of army boots

If you have very broad toes, the boots can be made as wide as you need it

Boots can look like a pair of hiking boots

If you have a slender foot, they can have a slender toe box

Custom boots can look like sneakers

Have a fun face on your shoes

A pair of light brown boots hidden by trousers

For hot weather boots can look like sandals

Some prefabricated extra depth shoes that are available with a lot of room to take a thicker foot orthoses

Multiple colours, styles & materials available.
All boots and shoes can be made with laces or Velcro.
It's all your choice!
